ABOUT US

Since 1988, **Aqua Drolics** is a specialist in **toddler pools** and **water play products** for young children. As a **market leader** we offer a **wide range of products**, produced from **Glass Fiber Reinforced Polyester (GRP)**. The products are **manufactured** in our own production facility in Best, the Netherlands. The products meet **standards set by the EU** and the majority of our standard products is **certified** according to the **TÜV Netherlands**. Aqua Drolics provides both **quality** and **durability**.

Aqua Drolics water play products guarantee 100% water fun!

FUN

100% water fun in more than 60 countries worldwide.

QUALITY

High-quality materials, unique designs and state-of-the-art production facilities.

SAFETY

Design, production and installation are in conformity with the European standards EN 1069, EN 1176 and EN 13451.

Please enjoy our new product catalogue with 40 new products and even more varieties!

TODDLER POOLS

Have you got space for a toddler pool? Would you like to design it yourself? With our wide selection of toddler pool elements, you can let your creativity run wild! You can choose from our Coloured, Jungle and Farm designs. Kids will be drawn to the colourful design and the excitement of water play products and won't be able to resist a dip!

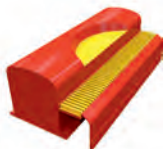

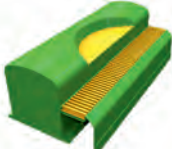

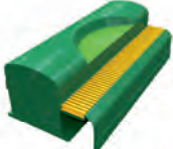

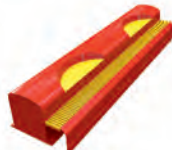

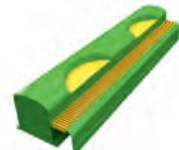

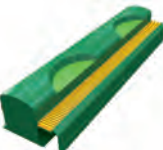

MODULAR TODDLER POOL

The variety of elements, Aqua Drolics offers for creating a toddler pool, makes it possible to choose your own shape and dimension of the pool. The elements are available as a standard in three styles: Coloured, Jungle and Farm. Below you can see the various elements in the different styles to help you design your own unique toddler pool.

The toddler pool will be installed by Aqua Drolics specialists, as this is quite complex. The elements will be placed directly on the existing floor. The floor of the pool will be laminated on the elements to make it watertight. The standard water depth of the pool is 22 centimeters (8.7 inches).

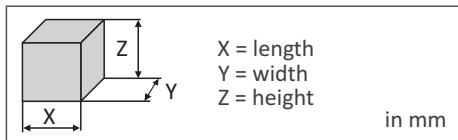

The advantages

- ✂ The elements are manufactured from high-quality Glass Fiber Reinforced Polyester (GRP) which is: very strong, UV and scratch resistant;
- ✂ The bright colours attract children and make them want to jump right in;
- ✂ While the children are playing, the parents can sit and relax at the edge or at the side of the pool;
- ✂ The preparations are compared to other bathing systems relatively easy.

A photograph of two young children sitting on a large, blue and white whale-shaped water play structure. The child on the left is wearing a yellow life vest, and the child on the right is wearing an orange life vest. They are both looking towards the right. In the background, another child is visible, and water is spraying from the structure. The scene is set in a pool with a red slide visible on the left.

WATER PLAY PRODUCTS

Looking for a nice, interactive design for your pool? This wide range of water-spouting products allows you to add as much colour as you like. Kids can use the hand pumps to operate the jets themselves and, for instance, fill a tumble bucket. The different styles of products allow you to create your own theme.

A photograph of a swimming pool with a yellow and blue slide. Three children are playing on the slide: a girl in a pink swimsuit is climbing up, a boy in floral swim trunks is holding a yellow ball, and another girl in green swim trunks is sliding down into the water. In the background, adults are sitting on lounge chairs and strollers are parked on the grass.

KIDS' SLIDES

What's a pool without a slide? Our various models of child-friendly slides will turn your pool into a kid's paradise. Ranging from a rainbow theme to the Monster of Loch Ness and from a tree trunk to a large family slide, there are plenty of options to choose from!

A man and a woman are running through a large, colorful rainbow-shaped water arch at a spray park. The arch is made of red, yellow, and blue plastic pipes. Water is spraying from the top of the arch. The man is shirtless and wearing purple shorts, and the woman is wearing a blue bikini. They are both smiling and splashing water. In the background, there are other colorful structures and a yellow staircase.

SPRAY PARKS

Playing with Aqua Drolics spray parks products is easy and fun for all ages. The combination of items provides an attractive and interactive water play area. The products are suitable for installment in a pool or on a floor with or without shallow water depth.

PLAY SHIPS

A journey on a ship across the oceans to teach kids about the roles and duties of the various crew members. A real pirate for one day, a steersman to stay on course, a sailor to raise the sails, or – even better – you can be the captain of your own ship. Ship ahoy!

A photograph of a water park with several colorful slides (yellow, red, and blue with stripes) and children playing. A man in patterned swim trunks stands in the foreground, looking towards the slides. The background shows a wooden fence and trees under a clear blue sky.

CUSTOM MADE

Aqua Drolics products are manufactured in our factory in the Netherlands. This means we can offer you any product or design you can think of to create a tailor-made kids' play area. Aqua Drolics can create all kinds of water play products. For example, if you have a mascot or logo, it will be our challenge to turn it into a fantastic water play object.

And so on... The options are endless!

COLOUR OPTIONS

All Aqua Drolics products are made from Glass Fiber Reinforced Polyester (GRP). Thanks to the high-quality materials and design, the products and colours are highly weather- and UV-resistant.

If you would like to choose special colours instead of the standard colour combinations, you can choose any colours from our colour palette below.

	Light blue, 911		Light green, 941
	Middle blue, 912		Dark green, 942
	Dark blue, 913		Orange, 951
	Light brown, 921		Pink, 961
	Middle brown, 922		Purple, 962
	Dark brown, 923		Red, 971
	Chocolate brown, 924		White, 981
	Yellow, 931		Grey, 991
	Yellow ochre, 932		Black, 992
	Yellow sand, 933		

WATER DEPTH

This foundation can be used if the water depth exceeds the maximum water depth of a certain water play object. Foundations are available in a round or a square shape, depending on the shape of the water play object.
