## Star Clear & Star Clear Plus

Hayward Star Clear and Star Clear Plus cartridge filters offer very fine filtration levels of 15 to 20 microns. Eco-friendly, they just need a stream of water to clean them, do not require backwashing and, therefore, do not discharge swimming pool water into the mains drain.

### The ADVANTAGES

- + Ideal for locations where space is at a premium or where there is a ban on discharging swimming pool water
- + Reinforced polyester cartridge for longer filtration element life
- + Filtration finesse : 15 to 20 microns

Re-equipment cartridges

### EFFICIENCY

- Filtration finesse: 15 to 20 microns.
- Maximum pressure: 3,5 bar.
- Do not require the use of additives such as flocculating agents.

### POLYVALENCE

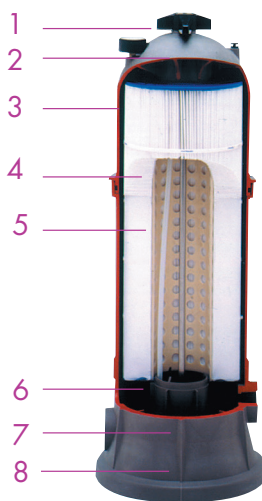

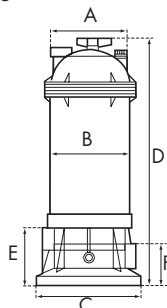

- 6 available models 6 to 40 m³/h for small size inground pools and spas.
- Thanks to its compact design, easily adaptable.

### EXTRA DURABILITY

- Injection-molded filter tank for Star Clear.
- Filter housing: injected of reinforced thermoplastic for Star Clear Plus.
- Corrosion-proof tank for use under all weather conditions.
- 10 years warranty on filter tank.

### EASE OF USE

- Pressure gauge, purge and drain plugs.
- Toggle closing handle for easy assembly of cover and filter housing.

Star Clear Plus cut away

- 1 Closing toggle: maintains the lid on the filter housing efficiently without a bolt or an attaching collar.
- 2 Cover: provides easy access to cartridge. By rotation, makes it possible to position the pressure gauge and the purge knob to suit your needs.
- 3 Filter housing: injected of reinforced thermoplastic to guarantee total resistance to corrosion.
- 4 Filter element: made of reinforced polyester, top quality for optimum longevity and easy cleaning.
- 5 Central strainer: waffle structure, providing optimum flow of water and excellent rigidity.
- 6 Raised header: prevents any accidental flow-back of impurities into pool when cartridge is removed for cleaning.
- 7 Base: corrosion-proof support ensuring perfect stability of the filter alone or of the filter used as a system.
- 8 Drain: 1/2" FIP plug allows fast draining of the filter.

Flow-rate	IN / OUT	Filter Surface	Wt. when empty	Side in mm						P / N
Hayward Star Clear Filter (6 m³/h to 11 m³/h)				A	B	C	D	E	F	
5,7 m³/h	1"1/2	2,3 m²	6 kg	235	203	267	508	117	57	C250EURO
